

louisville bike share

SPONSORSHIP PROGRAMS

High visibility opportunities to promote a healthy lifestyle and clean transportation in Louisville.

what is bike share?

Bike share programs are a convenient complement to public transportation networks, enabling both commuters and tourists to quickly and easily make short trips around town. They provide a healthy and affordable alternative to traditional modes of transit.

First popularized in Europe, bike sharing has quickly blossomed around the world. To date, there are over 500 cities with bike share programs and 500,000 bikes rolling on streets worldwide.

how does it work?

Bicycles are distributed throughout the city and are accessed through the purchase of a Day Pass or Membership. Riders use the bikes at their convenience to commute to work, visit friends, run errands, or just for fun. They can hop on a bike at one location, and drop it off at another.

how will it benefit the region?

Bike share will enhance Louisville's transportation network by providing access to bicycles near businesses, tourist destinations, educational institutions, and transit stops. The program will encourage bike riding as an environmentally friendly and congestion-reducing way to get around town.

why do consumers embrace bike share?

fun

Turns commuting into a daily adventure

Improves vitality and fitness

why is bike share important?

Bike sharing is a unique form of active transportation, an environmentally friendly transit option that serves to mitigate urban congestion and reduce carbon emissions while bolstering the local economy.

- ▶ Promotes a healthy lifestyle
- ▶ Creates jobs and supports local businesses
- ▶ Lowers healthcare costs through proactive exercise
- ▶ Strengthens and enhances the community
- ▶ Reduces carbon emissions
- ▶ Decreases road congestion and traffic
- ▶ Lessens our dependence on fossil fuels
- ▶ Attracts young professionals and tourists

health

Riding a bike is good for your health: 3 hours of biking per week can reduce the risk of heart disease and stroke by 50%!

economy

Bike share has a positive impact on the local economy. Every bike share trip produces \$7 in local economic activity.

planet

Bike sharing is the most environmentally friendly form of transit – no pollution, no congestion, just fresh air and big smiles.

transit

Bike share complements existing forms of public transportation, working to create a comprehensive network of transit options.

TRIPS PER YEAR

the bicycles: how they work

Bike share bicycles are GPS-enabled units that riders can locate, reserve and unlock using mobile devices, personal computers, or at hub kiosk locations. The bikes are the backbone of a scalable system that makes cycling accessible and interactive. Utilizing on-board computers, mobile communications and GPS technologies, the bicycles are state-of-the-art and fun to ride. Louisville will be choosing between one of two kinds of systems:

SMART DOCK SYSTEMS

Smart Dock bike share systems are currently the dominant form of bike share equipment in the United States. With smart docks, bicycles must be checked out and returned at specific dock locations. Stations provide riders with a network of locations at which to access bikes.

SMART BIKE SYSTEMS

Smart Bike systems allow bike share users to return a bicycle within a determined hub location using onboard locking and tracking technology. Riders can locate and check out bicycles on smartphones or at hub locations, offering heightened flexibility and convenience.

Checkout is a quick and simple process. For most systems, with the setup of a basic account and credit card information, riders can check out bikes for short periods, single days, or even purchase long-term memberships.

program scope

Louisville's bike share system coverage area will connect communities, attractions, businesses, and destinations; create green jobs; and attract companies and leading professionals to the region. This foundation will help the local economy to grow and prosper, improve community health, reduce road congestion, and augment personal mobility options.

Louisville will be launching with a 300 bike system, spread out across three complementary districts within the metropolitan area.

sponsorship opportunities

TITLE SPONSOR

- > System naming rights
- > Bicycles to display your company logo
- > Website and social media to include your company branding
- > Your company will benefit from ongoing promotions at community events
- > Other system elements will incorporate your branding
